ANUBHA SINGH

Product Manager — Core Platforms, Data Intelligence & Monetization

Bengaluru • +91 7903762263 •
anubhabit687@gmail.com
LinkedIn • Portfolio • **CSPO® & AIPO® Certified**

Product Manager with 3+ years of experience across omnichannel retail, fintech monetization, and high-frequency consumer platforms. Proven record deploying predictive ML models (70% last-mile ETA, 15% forecast accuracy) and architecting BigQuery Star Schemas. Specialize in AI-assisted rapid prototyping and full-stack execution.

CORE SKILLS

Product Platforms & Systems: Event-Driven Pub/Sub, Redis Counters, Rules Engines, Whitelabel Multi-Tenancy, REST APIs
Data, Telemetry & Applied ML: SQL, BigQuery, Looker, CleverTap, Demand Forecasting, ETA Prediction ML, A/B Testing
Monetization & Lifecycle: Subscription Paywalls, UPI Autopay Mandates, Razorpay Refund Automation, AOV Optimization
Product Craft & AI Tools: 0-to-1 Strategy, PRDs, Definition of Done (DoD), Agile/Scrum, Python, AI-Assisted Rapid Development

PROFESSIONAL EXPERIENCE

Independent AI Product Builder **Jul 2026 – Present | Bengaluru**

- **Test Maker (SaaS Assessment Platform):** To solve the high friction of digitizing unstructured question banks, built and deployed a full-stack web app from scratch leveraging AI-assisted rapid development; engineered a deterministic parsing engine and NoSQL Firestore DB to deliver timed mock exams and diagnostic scorecards (Case Study).

KPN Fresh — Associate Product Manager (Payments, Platform & Supply | 300+ Stores) **Feb 2024 – Apr 2026 | Bengaluru**

- **Omnichannel Data Foundation & BI Governance:** To eliminate data silos across legacy Blukode POS, 3rd-party WMS, and Odoo ERP, orchestrated event-driven webhook pipelines and architected a BigQuery Star Schema (12+ Fact, 5+ Dimension, and Metric tables) with a lean pod; defined the enterprise metric dictionary, Definition of Done (DoD), and data audit guardrails across 7 Looker dashboards—cutting data sprint cycles by 30%, saving 20 hrs/month of manual reporting, and lifting ML forecast accuracy by 15%.
- **Promo Engine & Omnichannel Attribution:** Architected a unified Promo Manager with an event-driven Blukode POS bridge (Pub/Sub) and Redis-backed atomic redemption counters; eliminated cart crashes, slashed promo launch time from ~1 day to <5 mins, and enabled closed-loop offline ROAS tracking via Meta Conversion API integration.
- **Loyalty Triggers & Subscription Promos:** To increase daily store revisits during KPN's 65th-anniversary campaign across 100+ stores, engineered an 'Applied Promotion Trigger' that automatically generated 30-day serialized coupon schedules (e.g., daily free milk on carts >₹99) upon qualifying SKU purchases; this cross-outlet loyalty loop drove a 40% surge in subscription customer revisits, a 10% lift in total transactions (NOB), and contributed 15% to overall GMV.
- **Last-Mile ETA & Tracking Infrastructure:** Architected a predictive order tracking engine using LightGBM and decoupled transit models (70% last-mile ETA accuracy); designed a friction-based bottom-drawer UI that slashed Google Maps API costs by >85%, deflected WISMO support tickets by >70%, and cut delivery delay rates from 40% to <15%.
- **Demand Forecasting & Automated Replenishment:** To resolve severe inventory stockouts caused by asynchronous legacy POS and WMS data silos, architected a multi-tier demand forecasting and replenishment engine integrating a BigQuery reconciliation bridge with LightGBM ML models; this shifted 300+ stores from manual ordering to an automated push model, cutting WMAPE forecast error by 15.3%, reducing retail stockouts by 22%, and shrinking perishable wastage by 18%.
- **Retail POS Modernization:** To resolve offline crashes and severe data sync leaks in 30 legacy POS systems, spearheaded a 30-point operational gap analysis decoupling sub-second cashier checkout from administrative flows; designed a local-first Cloud/Express POS architecture (Penguin POS) that eliminated manual reconciliation and established a zero-leak automated sync loop.
- **Omnichannel Refunds & CX Automation:** To resolve 48-hour resolution delays and heavy support volumes, led end-to-end UI/UX design across the flagship Android, iOS, and Web apps to launch a Razorpay-integrated self-serve refund engine; concurrently built an evidence-backed approval dashboard for agents and a live SLA monitoring board for the CC team, achieving 85% automation across 4L+ transactions, slashing CX calls from 45% to 15%, cutting TAT to ~12 minutes, and unlocking INR 4 Cr in repeat orders.
- **Data Reconciliation & CRM Recovery:** Resolved lagging hyper-local campaigns caused by historical migration gaps and POS API dropouts by engineering a BigQuery SQL reconciliation pipeline and deploying a Dead Letter Queue, successfully restoring 100% outlet code accuracy across 2M+ CleverTap profiles and driving a double-digit rebound in offline shopper engagement.

Classplus — Associate Product Manager (Subscriptions, Monetization & Lifecycle) **Apr 2026 – Jul 2026 | Noida**

- **Growth & GenAI Content Automation:** To resolve an 80% onboarding drop-off and copyright-blocked manual content operations, bifurcated the subscription funnel with complete WebEngage/Branch telemetry, and engineered a Gemini API-powered pipeline to autonomously generate, auto-tag, and format 500+ daily localized Hindi posts; this dynamic content engine boosted Day-0 engagement to 72%, lifted paywall conversion to 42%, and drove 13–18% UPI autopay adoption.

Quleep — Founding Product Manager | 0-to-1 B2B SaaS **Jan 2023 – Jul 2023 | India**

- **AR Commerce Platform (0-to-1):** To solve heavy operational bottlenecks preventing brands from adopting immersive 3D catalogs, architected and launched a multi-surface B2B AR marketplace (ARNxt) alongside an internal asset validation pipeline; this slashed 3D model onboarding time by 24+ hours, secured 30+ enterprise sellers, and drove the platform's acceptance into the IMT Ghaziabad incubation program.

Siemens Ltd — PMO | Urban Company — Category Growth Associate **Apr 2021 – Nov 2022**

- **Cross-Border PMO & Category Ops:** Drove engineering competency and project adequacy metrics across stakeholders in Australia, New Zealand, Indonesia, Korea, Malaysia, Singapore, and Thailand, executing 45 Project Management Maturity initiatives directed by Siemens Advanta (Siemens). Formulated partner quality audits across a network of 10,000+ service professionals, directly managing 20 SMEs to drive category NPS from 42 to 45 and scale the Personal Chef category to >89% SLA (Urban Company).

EDUCATION & ACHIEVEMENTS

B.Tech, Electronics & Communication Engineering (ECE) — BIT Sindri, Dhanbad (CGPA: 8.23/10 | Top 1% JCECE)
Honors: Transformer of the Year Award (Urban Company) • NextLeap Top PM Fellow • SIH Finalist (Top 4/900+ Teams)
